Intended as a guide for countries in generating systematic and comparable data on volunteer work by means of regular supplements to labour force or other household surveys. The objective is to make available comparative cross-national data on a significant form of work which is growing in importance but is often ignored or rarely captured in traditional economic statistics in order to establish the economic value of volunteering.

Who tends to volunteer and why? What causes attract certain types of volunteers? What motivates people to volunteer? How can volunteers be persuaded to continue their service? Making use of a broad range of survey information to offer a detailed portrait of the volunteer in America, Volunteers provides an important resource for everyone who works with volunteers or is interested in their role in contemporary society. Mark A. Musick and John Wilson address issues of volunteer motivation by focusing on individuals' subjective states, their available resources, and the influence of gender and race. In a section on social context, they reveal how volunteer work is influenced by family relationships and obligations through the impact of schools, churches, and communities. They consider cross-national differences in volunteering and historical trends, and close with consideration of the research on the organization of volunteer work and the consequences of volunteering for the volunteer.

This book offers a comprehensive overview of failure in business, management and consulting. It features contributions by experts from diverse fields, who share unique insights from their real-life experiences. Readers will find perspectives from leadership, project management, change management, innovation management, human resource management, counseling, restructuring, entrepreneurship and sports. The 6th Michigan Volunteer Infantry first deployed to Baltimore, where the soldiers' exemplary demeanor charmed a mainly secessionist population. Their subsequent service along the Mississippi River was a perfect storm of epidemic disease, logistical failures, guerrilla warfare, profiteering, martinet West Pointers and scheming field officers, along with the doldrums of camp life punctuated by bloody battles. The Michiganders responded with alcoholism, insubordination and depredations. Yet they saved the Union right at Baton Rouge and executed suicidal charges at Port Hudson. This first modern history of the controversial regiment concludes with a statistical analysis, a roster and a brief summary of its service following conversion to heavy artillery.

Since most research on work focuses on paid work, and most literature on education concentrates on schools, it is not surprising that studies on the relations between work and learning emphasize the relations between paid employment and organized education. This unique book deals with an area that has been rarely covered in the literature on work and education: the connections between volunteer work and informal learning. Through a variety of examples, ranging from the Red Cross to teacher-labourers, from cooperatives to social housing, and from participatory democracy to environmental social movements, this volume examines the learning dimension of volunteer work in different contexts. It also considers the special case of volunteerism among recent immigrants. The case studies analyze three basic types of voluntary organizations: those providing social services, representing local communities and mobilizing for social change. The chapters include profiles of the actual work their members do and detailed accounts of the learning practices they are engaged in during their work, and the impact of such learning on their personal and professional development. The concluding chapter offers a comparative analysis, practical recommendations and steps for further research.

This second volume in the Institute of Medicine's series on America's Aging explores the various productive roles that the growing number of elderly individuals can play in society through volunteer work. Some of the issues addressed include the main incentives and impediments to elderly volunteerism, the various forms of unpaid productive work and how they affect the health and well-being of the volunteer, and the recruitment of elderly volunteers that is done by various organizations. For policymakers, economists, sociologists, gerontologists, and social services agencies, this is an indispensable resource for the future.

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.
